

Screenshot of Apache NetBeans IDE 24 showing a Java project named "practica3".

The main window displays the code for `Practica3.java`:

```
4 package com.mycompany.practica3;
5
6 /**
7 * 
8 * @author monse
9 */
10 public class Practica3 {
11
12     public static void main(String[] args) {
13
14         int v1=4,v2=3;
15         int r;
16         r=v1+v2;
17
18         System.out.println("El resultado es:"+r);
19     }
20 }
21
22 }
```

The code defines a class `Practica3` with a `main` method that adds two integers and prints the result.

The `Output - Run (practica3)` window shows the execution results:

```
---- exec:3.1.0:exec (default-cli) @ practica3 ---
El resultado es:7
-----
BUILD SUCCESS
-----
Total time: 3.952 s
Finished at: 2025-02-25T10:33:06-06:00
```
